PE Automotive GmbH & Co. KG

Wuppertal, 18 May 2020

PE Automotive GmbH & Co. KG is further expanding its Aftermarket range.

To ensure that you never run out of compressed air, PE is now offering compressed air tanks as a reasonably-priced solution.

In addition to the existing portfolio of compressed air tanks by the manufacturer “Frauenthal Automotive” the PE product is the perfect alternative for the reasonably-priced maintenance of trucks and trailers.

PE’s own product marketing will be launched on 27 May 2020.

The trusted PE brand quality ensures that this product boasts optimal braking power and flawlessly functioning auxiliary consumers.

In the Truck & Trailer category, PE offers a large range of steel and aluminium tanks.

All products are manufactured in accordance with DIN EN 286-2 and meet the European industrial standards that apply to compressed air tanks and auxiliary equipment in truck and trailer vehicles.

This means that PE compressed air tanks are subject to the highest of quality standards and are designed for durability, primarily thanks to their coating.

“By continually expanding our PE product range, we are offering our partners and customers a huge choice of compressed air tanks and accessories” says Christian Salten, Head of Product Management.

He continues: “Starting with applications for trucks to fit e.g. Scania, Volvo and Iveco, we also sell standard tanks for the trailer”.

Available immediately ex works.

The 24-hour express delivery for popular models ensures an optimal supply and repair service.
