**PE Automotive GmbH & Co. KG**

Wuppertal, 2020-03-23

With the new introduction of NOx sensors as of 1st April 2020, PE Automotive GmbH & Co. KG is expanding its range – a clean affair through efficient pollutant reduction.

## Measure the amount of nitrogen oxide, compare for yourself!

NOx sensors with PE brand quality combined with the adsorption catalyst ensure efficient exhaust gas cleaning. Each sensor is 100% new and is individually calibrated and comprehensively tested before delivery. This benefits the environment.

NOx sensors with “German Engineering” can be easily and quickly installed by Plug & Play, for all common truck manufacturers.

For Ralf Maurer, Managing Director of PE Automotive, the inclusion of NOx sensors is an extremely useful product addition: "This product plays a decisive role for compliance with legal exhaust emission guidelines in commercial vehicles. They continuously control the amount of nitrogen oxide while ensuring the cleanest, most efficient combustion possible".

Garages and vehicle fleet operators play it safe with NOx sensors from PE. The tested durability also speaks for itself.

What's more – they are available immediately from the warehouse. The 24-hour express delivery for the most common models ensures an optimal supply and repair service.

This way to the product:
